Website

- What do you want ?

STCC

■ **Strategic Mission:**

- The purpose of the State Trauma Care Committee is to reduce the incidence of trauma injuries in Montana and to promote and advance excellence in the care of the injured patient.

■ **Strategic Directions:**

- Organizational / Emergency Preparedness
- Information System / Performance Improvement
- Education
- Prevention / EMSC Oversight
- Public Advocacy / Legislative

Organizational Committee

Strategic Mission:

Reduce the incidence of traumatic injury through identified public injury prevention education and to improve the care of the injured patient through clinical education of caregivers with proven intervention strategies.

Strategic Goals:

- ATLS / TEAM / PHTLS / RTS / TERN / TNCC / Pediatric Education / BTLS / STN Course
- prehospital / nurse / physician education
- public education - targeted strategies eg. Think First / Risk Watch
- RTAC education
- interagency strategies
- education inventory and evaluation

STCC Organization/Disaster

- Strategic Mission
- Integrate disaster preparedness and response as a component of a state trauma system
- Goals:
 - Establish a medical “strike team” to support Montana communities in the event of a disaster
 - Establish a planning forum for disaster preparedness and response to include medical providers and hospital planners to assure triage, treatment, transport of disaster victims and the safety of medical providers

Information System Committee

Strategic Mission:

Provide for collection, integration and analysis of trauma data in order to derive meaningful and useable data.

Strategic Goals:

- trauma register
- EMS / prehospital data
- workforce / facility resource inventory
- cost of injury...
- emergency department data / population based data / rehab data
- UB-92
- data linking
- HIPAA
- 100% hospital reporting
- technical assistance to facilities

Quality Improvement

Strategic Mission:

To use information from the information system to analyze the factors and components of traumatic injury in order to improve the trauma care process and injured patient outcomes.

Strategic Goals:

- state and regional indicators - problem driven
- regional / interfacility QI
- participation (performance vs. potential
- QI plan
- standards and process
- facility QI

IS/PI

- **Strategic Mission:**

- Provide for collection, integration and analysis of trauma data in order to derive meaningful and useable data. To use this information to analyze the factors and components of traumatic injury in order to improve the trauma care process and injured patient outcomes.

- **2005 Benchmarks**

- Develop trauma information system and performance / quality improvement plan with:
- Identify and begin use of trauma information sources
- Identify and begin use of regional and state-wide benchmarks

Education Committee

Strategic Mission:

Reduce the incidence of traumatic injury through identified public injury prevention education and to improve the care of the injured patient through clinical education of caregivers with proven intervention strategies.

Strategic Goals:

- state and regional indicators - problem driven
- regional / interfacility QI
- participation (performance vs. potential
- QI plan
- standards and process
- facility QI

Education

■ **Strategic Mission:**

- Reduce the incidence of traumatic injury through identified public injury prevention education and to improve the care of the injured patient through clinical education of caregivers with proven intervention strategies.

Public Advocacy / Legislation

- **Strategic Mission:**
- Build executive, legislative, and public support for continued development and maintenance of trauma system.

Prevention Committee

Strategic Mission:

Build executive, legislative and public support for continued development and maintenance of the trauma system

Strategic Goals:

- funding
- education - stakeholder awareness
- support for trauma policy and programs
